

Management Overview

BASIC FACTS

	Chief Executive Officer	▼
	Florens Gressner	
	(also Co-founder)	
	Head of Product Management	▼
	Felix Assion	
	(also Co-founder)	
	Head of Operations	▼
	Sebastian Kotte	
	(and Authorized Officer)	
	Head of Research	▼
	Holger Trittenbach	
	Head of Engineering	▼
	Currently vacant	

CEO biography

AUDIENCE	LENGTH	WORDS
General	Medium	100

Florens Gressner (Greßner) is co-founder and CEO of neurocat, a Berlin-based DeepTech startup offering safety validation solutions for ADAS/AV perception components. A mathematician with a focus on statistics and optimization, he founded neurocat to transfer the abstract mathematics of academia to applied purposes in the field of Machine Learning testing and quality assurance. His expertise has contributed to numerous industry solutions in risk assessment, robustness, and interpretability of AI systems across use-cases. Currently Florens and neurocat are scaling their solutions by offering a SaaS toolkit that ensures coverage of the ODDs, scenes, and data required to deploy safe mobility perception components.
